

CirPark Scada

New software for the Green Parking

CirPark Scada

New software for the Green Parking

CirPark Scada is an efficient platform that combines all Circontrol mobility solutions into a one click software. This platform is the most powerful and comprehensive tool which main goal is minimizing operational parking cost, monitor activities and bring maximum comfort for users. CirPark SCADA introduces many advantages in the market, which are detailed below.

CirPark

Parking guidance systems

LedPark

Intelligent LED lighting system

New concept of parking with **CirPark Scada**

CirPark Scada Software

CirCarLife

Intelligent recharging solutions
for electric vehicles

PowerPark

Energy efficiency and
parking automation

Management & Control Software

The software provides capability to create full report & graphical layout information by areas, levels, lanes for occupation and movements. New reports for type of bays, groups, parking, etc....

The software has historic log for available spaces, period of time & provides real time monitoring of all system status.

Energy saving management & light indicators according to occupation. Carbon footprint reporting for LEED certificate.

Report system information on any mobile system with internet connection by using RSS events information.

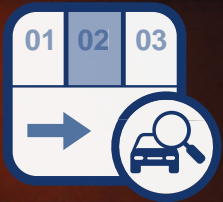

Software is able to monitor electricity consumption, voltage, energy, harmonics.

Monitor CO monoxide system, temperature map and IP CCTV

Find your car

Function to find where driver park their vehicle with or without ticket based on period of entry into the parking and car still parked. Find your car by use of QR Codes through handheld devices.

Parking Traffic Management & Control Software

Antitheft

Feature to notify in case of a vehicle is stolen. The system allows to configure the period of time while the car should remain parked. If that space is unoccupied earlier than the set time, the system will report with different alarms (popup alarms, sound, relay activation etc...) and send email notification.

Easy bay finder

Function for blinking on free bays green colour and red fix, to bring attention of driver on free bays.

Space reservation

Occupation time & date report
VIP & Families & EV spaces
Tenant & Season spaces
Events reservation

Application has built in tools for third company integration to obtain real time information in XML & OPC protocol.

HTML5 Allow any handheld device to operate with the software
