

Model DSSP6003A

Pedestrian Security Gate (manual lock)

The DSSP6003A is a manually operated, simple type of half-height pedestrian gate, which is unlocked with a mechanical key on the exit sides. It is typically used either independently or in conjunction with a half-height turnstile to regulate access in areas requiring strict traffic control. This combination is the most common and ideal solution for managing access for package deliveries, carts, and individuals with disabilities.
