

### Description

The JSL-B4 is a compact, ultra-thin 4.3-inch mechanical pushbutton indoor unit designed for reliable and convenient communication in residential and commercial intercom systems. It supports hands-free talk-back, remote unlocking, emergency calls, and multi-zone alarm functions, making it ideal for apartments, villas, and office environments.

### Main Features

- 4.3-inch color display for clear visual communication.
- Hands-free talk-back and remote door unlocking for convenience.
- Image capture and storage (optional) to enhance security.
- Outdoor station monitoring for real-time surveillance.
- Emergency call function to contact the management center instantly.
- Message handling – receive or delete information from the guard center.
- Searchable message log for quick information retrieval.
- Four-zone alarm function for enhanced home security.
- Code-based arming/disarming of garrison mode.
- Adjustable image brightness, volume, and color to suit user preferences.
- Ultra-thin, wall-mounted design for space-saving installation.

### Specification

Display	4.3-inch color screen
