

Description

The JSL-IN601 Series is a 4MP network camera with a durable metal body, delivering sharp images and reliable performance in both day and night conditions. Featuring advanced low-light technology, human detection, and weather-resistant design, it's ideal for both indoor and outdoor security applications.

Main Features

- 4MP resolution with 3.6mm fixed lens
- 36pcs IR LEDs, night vision up to 25m
- H.265 / H.264 video compression
- Smart human detection
- Weather-resistant metal housing

Specification

| | |
|--------------------------|------------------------------|
| Model | JSL-IN601 Series |
| Image Sensor | 1/2.9" CMOS sensor |
| Material | Metal housing, Linux-based |
| Lens | 3.6mm fixed-focus |
| Infrared LEDs | 36 × 14μ high-power LEDs |
| Infrared Distance | 20–25 meters |
| Video Compression | H.265 / H.264 |
| Low Illumination | Supported |
| Main Stream | 4.0MP @ 20fps; 3.0MP @ 25fps |
| Smart Features | Human detection |
| Weatherproof | Yes (indoor/outdoor use) |
| Packing Size | 200 × 105 × 100 mm |
