

## Instruction

The curtain motor features slow-start and slow-stop functions, manual activation, automatic stop when encountering obstacles, and manual operation during power outages. It supports up to 50 kg of fabric and offers multiple track options, including straight and curved rails. Ideal for hotels, villas, luxury apartments, and other refined spaces.

## Key Features

- AC motor
- Patented head for easy installation
- Remote Control
- Soft start and soft stop
- Obstacle Detection
- Ultra-Quiet Operation
- Adjustable Speed Control
- Pluggable Intelligent Control Module

## Technical Parameters

- Torque:1.2N.m
- Output Speed:12cm/s
- Rate Voltage:100-240V
- Nominal Frequency:50/60Hz
- Rated Current:0.08A
- Net Weight:0.77kg
- Dimension:40x40x305mm
- Insulation Index:CLASS B
- Protection Index:IP40
- Working Temperature:-10° C to +60° C
- Power Cord:3 Wires
- Connection:Zigbee
